

# WIRELESS PRESENTATION MOUSE USER MANUAL

MODEL 176569

  
**MANHATTAN™**

MAN-176569-UM-0507-03

# INTRODUCTION

Thank you for purchasing the MANHATTAN® Wireless Presentation Mouse, Model 176569.

The ideal tool for the perfect presentation, this wireless mouse puts multi-tasking, mouse capability, presentation controls and a built-in laser pointer in the palm of your hand with an effective range of 15 m (50 ft.). Secure 2.4 GHz wireless technology offers eight channels with more than 4,000 IDs per channel to help ensure a reliable connection without interference from other wireless devices.

The dual-function design — allowing the mouse to be transformed from a presentation laser pointer to a desktop optical trackball mouse — includes no-slip feet that keep it steady on a desktop.

The easy-to-follow instructions in this user manual help make setup and operation quick and simple, so you'll also soon be enjoying the benefits of these additional features:

- Ergonomic, five-button format designed for comfortable use with either hand
- USB receiver with Plug and Play installation; Windows and Mac compatible
- Lifetime Warranty

## CE and FCC Approved

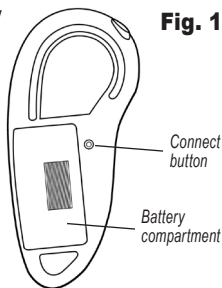

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired operation.

This device complies with DHHS Radiation Performance Standard 21 CFR, Subchapter J.

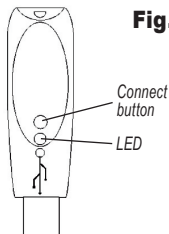

**CAUTION:** Laser radiation when opened. Never point a laser beam into a person's eyes or view a laser beam directly, as prolonged exposure can be hazardous to the eyes.

# INSTALLATION & SETUP

1. Push and slide open the cover of the battery compartment (**Fig. 1**); install the batteries; replace the cover.
2. Plug the USB receiver into the USB port on the computer. The LED (**Fig. 2**) turns on to indicate that the computer has detected the connected device.
3. Slide the Power/Mode switch (**Fig. 3**) from the Off position to either the Presentation mode or the Mouse mode position.
4. Press and release the Connect button on the USB receiver (**Fig. 2**). The LED will turn off.
5. Hold the mouse near the receiver and press the Connect button on the underside of the mouse (**Fig. 1**). The LED on the receiver will turn on again, indicating that the setup is complete and the mouse is ready for use.

# FUNCTIONS/OPERATION

The MANHATTAN Wireless Presentation Mouse can be used as both a handheld presenter and a desktop trackball mouse. Its three function modes — Presentation, Mouse and Off — are selected by using the Power/Mode switch (**Fig. 3**).

**NOTE:** The effective range of the mouse is 15 m (50 ft.). Operating beyond this distance can adversely affect its performance.

## Presentation (Handheld) Mode

Slide the Power/Mode switch to the Presentation mode position and hold the mouse in your hand to operate. Press and hold the Laser key (**Fig. 4**) to activate the laser pointer; release the Laser key to deactivate the laser pointer.

## Mouse (Desktop Trackball) Mode

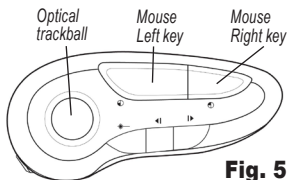

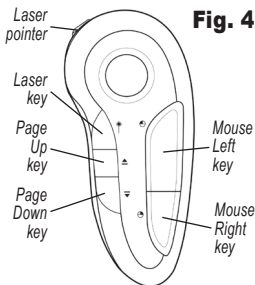

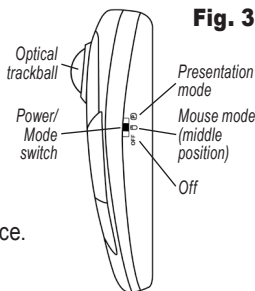

To convert the presenter to a mouse, slide the Power/Mode switch to the Mouse mode position and place the mouse on any solid and sturdy surface. For proper scroll and mouse-button function, position the device with the trackball on the left (**Fig. 5**).

**NOTE:** After inactivity, the unit will enter the Auto Power Save mode. To return to normal function, touch the trackball or any of the keys.

**NOTE:** A flashing trackball indicates a proper connection, with the mouse receiving/transmitting data.

## Off

Slide the Power/Mode switch to Off when not in use to save the battery.

# SPECIFICATIONS

## Standards and Certifications

- USB 1.1 receiver; CE and FCC approvals
- Class 1 Laser product; deep red laser diode (650 nm; 1 mW output)

## General

- 2.4 GHz ISM Band RF with 8 channels (4,096 IDs per channel)
